Projects

2023/12 – 2024/02	E-Tour <i>Java, Java EE, Servlet, Jsp, MYSQL</i> E-Tour is a web-based application for online booking of various tours. The main objective of the project is to create a fast, effective, and reliable online working platform to develop a communication system between customers and the agency. We have implemented authentication and authorization so that only authorized users will be able to register, login, and book a tour. Also, users can search for a particular tour based on duration, cost, and date, and on successful booking, a bill will be generate.
2023/05 – 2023/06	Single Page Site I have built a single-page website having 4 different page links but it will all open on the same landing page. The page sections will open overlapping the landing page section. I have created this site using HTML, CSS, and JavaScript.
